

Mr Knife Guy

Knife & Scissor Sharpening Specialists

KNIFE AND SCISSOR SAFETY

Thanks for your purchase. Knives and scissors are sharp tools and should always be used with care. For your safety, please read and follow this guidance.

Age restriction

Our products are intended for use by adults aged 18 and over and should be kept safely out of reach of children at all times.

Safe use

Always work with care and control. Cut away from your body, keep fingers clear of the blade, and use a stable surface. Avoid using any tool that is damaged or has a loose handle, and never leave bladed items unattended.

Storage

When not in use, store your knives and scissors securely. A knife block or wall magnet provides safe, accessible storage for knives, while scissors are best kept in a protective case.

Cleaning and care

Hand wash only and avoid leaving items in water or in the sink. Dry thoroughly after cleaning to maintain both performance and condition.

Sharpening

To maintain performance, use suitable sharpening tools or a professional service. Sharpening equipment should always be handled and stored with care.

Transport

When moving your knives or scissors, use appropriate blade guards or protective cases. Loose blades should never be carried in bags or pockets.

Legal notice

Responsibility for the safe and lawful use of these items passes to the buyer upon delivery.
